

# Jalosome<sup>®</sup> Oral Barrier

Medical device in gel useful for the management of oropharyngeal mucositis

## PRODUCT DESCRIPTION:

Jalosome<sup>®</sup> Oral Barrier is a Medical device indicated for the management of painful symptoms of oropharyngeal mucositis. Jalosome<sup>®</sup> Oral Barrier carries out its analgesic action thanks to its high mucoadhesive properties, that allows to form a protective barrier on the oral mucosa. The protective film protects from harmful factors favoring lesions healing maintaining hydrated and lubricated the oral environment. Mucositis severity and duration in patients treated with radiotherapy depend on radioactive source, cumulative dosage, dose intensity and volume of the irradiated mucosa. Lesions are seen mostly on the movable mucosae of the buccal mucosae and lateral and ventral surfaces of the tongue.

## AREA OF USE:

- Mucositis caused by Radio and Chemotherapy
- Aphthas
- Ulcers
- Recurring aphthous stomatitis
- Mouth surgical interventions
- Difficult extractions
- Implantology
- Traumatic ulcers from prostheses and orthodontic interventions
